

# Chris F. Andrews

FIS Director of Information Security

Chris Andrews is Director of Information Security for FIS, a position he has held since 2013. In this position, Andrews is responsible for strategic direction of FIS information security initiatives, including direct oversight for enterprise information security strategy, defense in depth, ensuring all solutions meet information security standards and FIS' appetite for risk.

Andrews has more than 20 years of experience in various levels of information security within the financial services industry. He has held a number of positions throughout his tenure with FIS, ranging from security operations, engineering, architecture, management of information security operations, and security initiative and governance oversight. Prior to FIS, Andrews filled a role of sourcing information technology solutions and financing responsibilities for Texaco, Inc.

Andrews holds a Bachelor of Science in Finance with a minor in Computer Science from University of Utah, Salt Lake City, UT.
